

## **School children visit to Insectarium, NBAIR, Bengaluru**

The students from Presidency School, Yelahanka branch, North Bengaluru visited the Insectarium at Hebbal campus of the Institute on 06 September 2019. Around 180 students of second Grade have been brought to give an exposure to the insect world, useful and harmful insects around and amazing facts of insects. They were shown the live insects and preserved specimens of both harmful and beneficial insects and were explained about the insect world in simple terminology. Later the children visited the insect photo gallery to get an insight about the variety of insects present around. The students interacted actively and shown interest in looking at the various species of insects displayed in the insectarium.
